TRAP ATTACK

Grease Trap and Drain Line Treatment

- Multi-enzyme formula
- 100% bio-degradable
- Non-corrosive, non-toxic
- Non-pathogenic
- Floral, Orange

Dilution rate: Up to 1:10

PHYSICAL PROPERTIES	Trap Attack - Floral
Appearance: Liquid	S826334-12 – 12-1 quarts
Specific gravity: 1.00-1.01	S826334-04 – 4-1 gallons
Color: Hazy green	S826334-05 – 5 gallon pail
pH: 6.0-8.0	S826334-55 – 55 gallon drum
Fragrance: Floral	Trap Attack - Orange
Dilution: Up to 1:10	S437584-12 – 12-1 quarts
	S437584-04 – 4-1 gallons
	S437584-05 – 5 gallon pail
	S437584-55 – 55 gallon drum

DIRECTIONS: For optimum results, an initial “slurry” of two gallons of Trap Attack should be applied directly to a freshly-pumped grease trap to create a “bio-mass”. After the initial treatment, Trap Attack should be applied daily, by a timed injector pump. The pump should be connected to the main line leading directly to the grease trap, add 20 ounces of Trap Attack per day, during the period of lowest water use. Automatic Feeder: Install container cap and liquid-drip feeder, making sure the 3/4” knockout plug has been removed so the chemical will feed into the automatic feeder. Check that the connections are tight so that air cannot leak into the container. Lay the container on its side so the automatic feeder points down. Adjust the valve for the desired flow rate. Set automatic feeder for minimum flow.

STORAGE and HANDLING: Keep container tightly capped with label intact. Do not reuse containers. Can cause eye irritation. Do not get in eyes. Harmful if swallowed. First Aid: Eye contact-Remove contact lenses. Flood eyes with water for at least 15 minutes holding eyelids apart. Ingestion-If swallowed, drink large amounts of water. Skin Contact-Wear gloves to prevent irritation. If irritation persists, seek medical advice.

Keep Out of Reach of Children. Industrial or Institutional Use Only.
